NEW ITEMS - Pricing on all new items is for in-stock merchandise only!

Century .6X W/A Adapter for 3X Canon XL1 - \$129.00 (Partial Zoom for Canon XL1 & XL2 cameras)

Century .7X W/A Converter 65mm \$529.00

Century's .7X Wide Angle Converter clamps onto the front of your 65-75mm front diameter lens, offering a 30% wider angle of view, full zoom-thru capabilities and no appreciable light loss.

Century 2.0X Teleconverter 58mm MKII - \$299.00

The 2X Tele-Converter is a front-mounting accessory that provides greater telephoto reach. The 2X Tele-Converter instantly shifts the focal length range in the telephoto direction.

Unlike typical rear-mounted telephoto extenders, the Century Tele Converter provides doubling of the indicated focal length (through the higher end of the zoom range) without light loss, along with front-mounting convenience.

Note: Vignetting will occur from mid zoom range to wide angle producing a porthole effect which is common with all tele-converters.

Century .6X Wide Angle Adapter 58mm \$119.00

Partial Zoom for cameras with a 58mm threaded front. For Sony VX1000, 2100, 2000, PD150 and PD170
Can also use with any 43mm – 58mm threaded front by using a step up ring. Rings come 43mm-58, 49mm-58 and 52mm-58
Rings are additional pricing.

Tiffen award-winning filters have been improving images for 70 years. Our ColorCore™ technology allows us to control the color and density of every Tiffen filter. Consistency, superior quality, engineering excellence, innovative product design and a 10 year warranty...no wonder Tiffen filters are the overwhelming choice of moviemakers and professional photographers worldwide.
